[Project No. 14697-000]

Advanced Hydropower, Inc.; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Competing Applications

On August 3, 2015, Advanced Hydropower, Inc. filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the McNary Dam Advanced Hydropower Project (McNary Dam Project or project) to be located at U.S. Corps of Engineers' McNary Dam near Plymouth in Benton County, Washington and Umatilla in Umatilla County, Oregon. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would utilize flows at the existing McNary Dam, and would consist of the following new features: (1) a 52-foot-wide, 40-foot-high gated intake located on the upstream side of McNary Dam; (2) a 32-foot-wide, 34-foot-high, 234-foot-long concrete penstock installed through McNary Dam; (3) a 34-megawatt vertical shaft Alden turbine; (4) a draft tube discharging flows to the existing McNary Dam tailrace; (5) a 1.24-mile-long, 13.8- or 23-kilovolt transmission line interconnecting with the existing McNary Dam switchyard; and (6) appurtenant facilities. The estimated annual generation of the McNary Dam Project would be 148.92 gigawatt-hours.
